

# THE SWAZI EDUCATION FUND

## And another year has begun...

Thank you for your on-going support of the Swazi Education Fund, through GAGA UK. A new school year has begun in Swaziland, and thanks to your support and donations, we are helping even more children access secondary school. You're awesome, and here's why...

The Education Fund is now supporting 24 students through secondary school. Wow!! Most of these are the same children as last year, as we continue to support them through their education. We have also added new children, as some either finished school, or dropped out (due to various circumstances)

Year upon year we hope to support more and more children, and in various ways. Children living in rural and impoverished areas of Swaziland are often excluded from attending secondary school because of the high costs of fees, uniform and transport. You are helping to give 24 children the opportunity of such a better life

Minenhle (\*not real name), has lost both of his parents. He stays with his brother who is a security guard, and his brother's wife. He has older siblings, but they are

scattered all over the country and have no formal employment. Before Minenhle was enrolled on to the programme, he was staying at home as there wasn't enough money for school fees. Now he is able to go to school, he will have a much better start at life - we can't wait to see what the future might bring for him and the others on the programme.

**'Education is the most powerful weapon you can use to change the world'**
